

Proposal for "TechConnect"

A Department Technical Knowledge Sharing Initiative

Proposed by:

Nisarg Patel – B.Tech Information Technology, Semester V

Saumya Pathak – B.Tech Information Technology, Semester V

Introduction

TechConnect is a student-led technical knowledge-sharing initiative proposed for the Information Technology and Computer Engineering departments. The initiative aims to conduct one interactive technical session every 15 days, where students, senior students, or faculty members present on a topic based on their technical knowledge, project experience, research, or academic expertise.

Purpose

Students frequently seek guidance on areas such as project development, internships, hackathons, technology selection, Git & GitHub, open-source contributions, placement preparation, and emerging technologies. TechConnect aims to provide a structured platform where such topics can be discussed through peer learning and faculty interaction, complementing the existing academic curriculum.

Working Model

- **Frequency:** One session every 15 days
- **Duration:** 60–90 minutes
- **Speakers:** Students, senior students, and faculty members
- **Session Format:** Presentation (40–50 minutes) followed by an interactive Question & Answer session (15–20 minutes)
- **Audience:** Students of the Information Technology and Computer Engineering departments

Coordination

The initiative will initially be coordinated and managed by:

- **Nisarg Patel**
- **Saumya Pathak**

The coordinators will be responsible for topic planning, speaker coordination, scheduling sessions, publicity, event management, and feedback collection. The initiative will function under the guidance and approval of the department.

Topic & Speaker Selection

Topics will be selected based on student requirements, faculty recommendations, current industry trends, and speaker expertise. Each session's topic, speaker, and schedule will be finalized after obtaining prior departmental approval.

Resources Required

- Lecture Hall / Lab
- Projector
- Microphone and Speaker

Expected Benefits

- Establish a regular platform for technical knowledge sharing within the department.
- Encourage interaction and knowledge exchange between junior and senior students.
- Increase awareness of technical domains, projects, internships, and placement preparation.
- Provide opportunities for students to develop technical presentation and communication skills.

Conclusion

TechConnect is proposed as a departmental technical knowledge-sharing initiative that complements classroom learning through structured peer learning and faculty interaction. With departmental guidance and active student participation, it can serve as a sustainable platform for regular technical discussions and experience sharing within the department.

Note: *TechConnect is proposed as a non-commercial, department-supported academic initiative. Participation of speakers and attendees will be voluntary.*
